Rudgwick Steam and Country Show

The wireframes are a way for us to see where items will be on the page it is not a final design just a reference for us to use when designing the page. There is no design or styling used on them. We made three style tiles for the site on for the home page for a desktop layout which will look like most of the other pages on the site. There are also two wireframes for the of the home page in mobile view. We also did one for the event page because it will have a different layout from the other pages.
